

Text Layout Examples

1. Cell Method Examples:

Left aligned	Centered	Right aligned
--------------	----------	---------------

Filled cell	Another filled
-------------	----------------

2. MultiCell Method (word-wrapped text):

This is a long paragraph that demonstrates the MultiCell method. The text will automatically wrap to fit within the specified width, creating multiple lines as needed. This is very useful for displaying longer content in your PDF documents.

3. Write Method (flowing text):

The Write method outputs flowing text that **automatically wraps** to the next line when it reaches the right margin. You can *change fonts* mid-sentence for emphasis.
