Example 9: Image Support (JPEG)
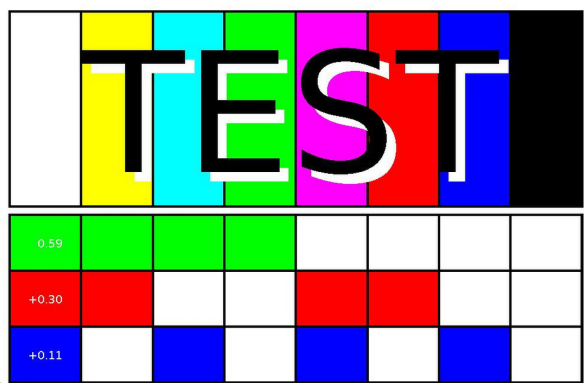

This example demonstrates how to embed JPEG images in PDFs. To test this feature, provide a path to a JPEG file on your system.
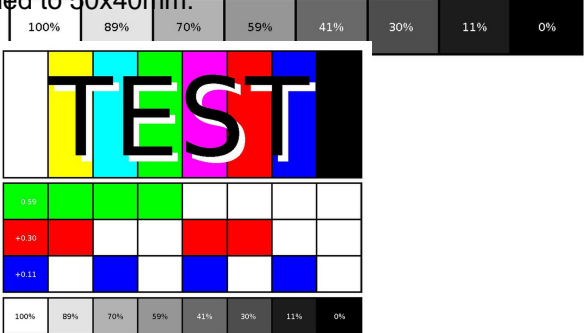

Image Support Demonstration

JPEG Image Test

/Users/jeanyves/xojo2015/Xojo_fpdf/test.pdf.jpg

1. Scaled to width=80mm:

2. Scaled to 50x40mm:

PNG Image Test

/Users/jeanyves/xojo2015/Xojo_fpdf/test.pdf.png
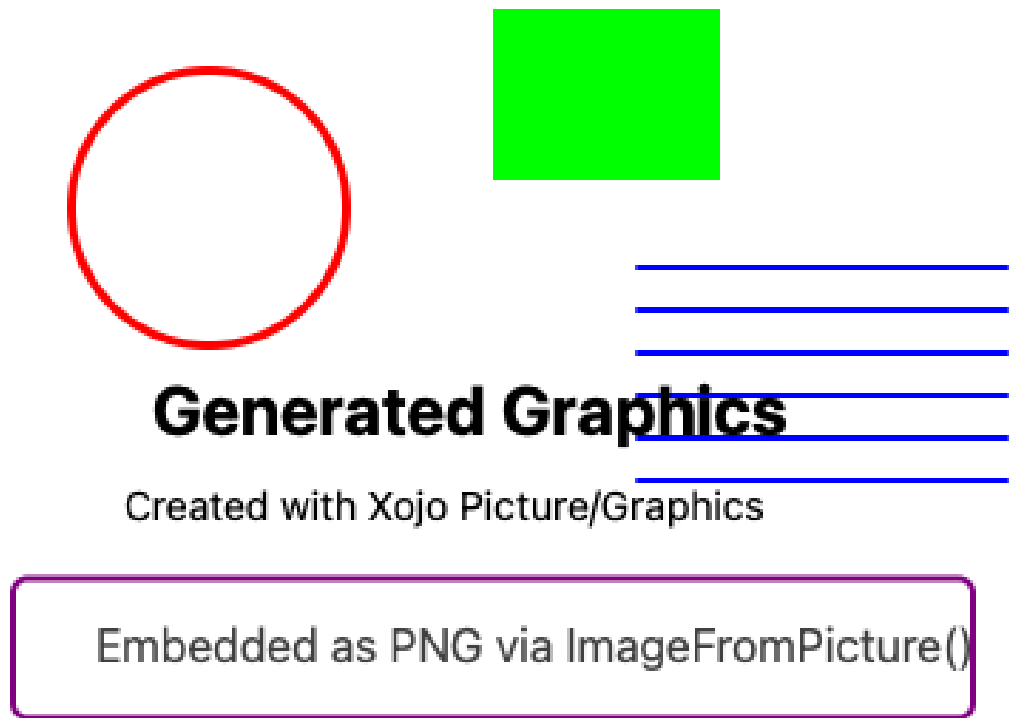

1. Scaled to width=80mm:

2. Scaled to 50x40mm:

Programmatically Generated Graphics (ImageFromPicture)

The ImageFromPicture() method allows you to draw graphics using Xojo's Picture/Graphics API, then embed the result as a PNG image in the PDF.

1. Generated Picture (400x300 pixels) at width=150mm:

2. Same Picture at 80x60mm:

DesktopChart Embedding (Desktop Only)

DesktopChart can be converted to Picture using ToPicture(), then embedded with ImageFromPicture().

DesktopChart converted to Picture at width=170mm:
